

CCS Healthcare and Lipidor cooperate on new skin care technology for use in new products

2014-09-15

CCS Healthcare, one of the Nordic region's largest manufacturers of skin care products, pharmaceuticals and hygiene products, licenses the new AKVANO® technology, developed by Lipidor AB.

CCS Healthcare has a turnover of about 500 MSEK divided into hygiene and skin care products, pharmaceuticals, dental, and contract manufacturing.

"Having access to AKVANO technology will enable us to develop CCS-products in a new way for hygiene and skin care products and pharmaceuticals. We will be able to offer our customers new competitive solutions within our core product areas", says Jonas Nilsson, CEO of CCS Healthcare. The licensing of AKVANO is in line with the company's strategy to expand its offering of new and interesting products in its core market segments, hygiene and skin care.

"We are very excited about this product cooperation with CCS Healthcare. We see great opportunities for successful product launches in a number of different markets", says Anders Carlsson, CEO of Lipidor AB.

AKVANO technology represents a completely new dosage form that creates a lipid layer on the skin surface for effective topical delivery of drugs and skin care treatment. AKVANO's innovative and easily applied formulations offer significant advantages over many currently available ointments and creams.
