

A novel spray product with a unique emollient and moisturizing effect on the skin

AKVANO® Emollient Spray softens and heals dry skin. Now available for your brand.

FACTS

Market segment

Moisturizer and emollient, Personal care.

Composition

Phospholipids, ethanol, cyclomethicone D5
Optional additives in the form of fragrances.

Classification

Cosmetic product (EU).

Effect validation

Consumer tests.
TEWL test on pharma formulation placebo.
Non irritating according to skin irritation testing in humans and additional clinical trial (Bioskin, DE).

IP

AKVANO technology is patent protected.

Shelf life

3 years.

Packaging

Bag-on-Valve spray container.
Available in 30 ml, 50 ml, 100 ml, 125 ml, 200 ml, 250 ml.

Presentation

Customized container design possible using sticker labels and preprinted cans (recommended for 25,000+ per order).

The formulation is based on the novel proprietary lipid-based technology AKVANO, a unique lipid solution with the ability to incorporate and deliver active ingredients.

AKVANO Emollient Spray applies a lipid layer on the skin that strengthens the skin barrier and provides an intrinsic moisturizing effect on the outer skin (*stratum corneum*), also preventing further dryness. The emollient effect is provided by the nourishing lipids deposited on the skin.

AKVANO Emollient Spray contains only three ingredients – phospholipids, volatile silicone oil and ethanol – all of which are well known in skin care applications and safe to use on normal or irritated skin. Phospholipids are natural materials of vegetable origin (soybean), which are non-toxic, very well tolerated, dermatologically safe and enjoy GRAS status, as all other ingredients.

AKVANO Emollient Spray is manufactured in cooperation with Aurena Laboratories AB, whose Bag-on-Valve spray technology guarantees product integrity and function, including convenient spraying from any angle. For more information see www.bagonvalve.com

Intended use

For convenient softening of the skin, including treatment of dryness and other skin conditions.

Claims

- Provides a unique emollient and moisturizing effect on the skin
- Provides soft, silky feel to the skin
- Leaves no sticky or oily residue or build-up
- Free from additives and preservatives
- Can be sprayed from any angle
